"stopping by"

JUL 11 1972

STREET, N.W. WASHINGTON, D.C. 20037

Of course I would like to keep this in mind for some visit in Washington. May I have your current home phone no. for the event?

I am very sorry to learn of your separation -- not the event itself (which from my own experience is likely to be a point of release) but all that must have preceded it, for both you and Peg. I also know the anxiety about how your erstwhile friends will be able to deal with you, and above all the awkwardness of whether or not to refer to it. But I don't think anyone will be 'deterred', to use your phrase. I hope there may just be somewhat less grief for both of you in future times.

This will await your return from the "Ship of Fools". As Doxiadis may have told you, I was very much looking forward to being on the same cruise, and am very sorry that I had to give up that plan at the last minute. One of the considerations (not the only one) was that Marguerite is just now (July 1) beginning a residency program in psychiatry, about which she is of course very much excited -- but which is quite taxing. Since Peg and I had; it is perhaps

I take to heart what you say about a useful product. For this summer's program, Jim March has taken over a good deal of responsibility (and authority) and it may not go quite in the direction I might have preferred: but what do I know? I expect to say "more in September than today".

Sincerely,

PROFESSOR JOSHUA LEDERBERG
